

TIP SHEET

Viewing EMS Charts

Beginning **Tuesday, Feb. 15**, Virtua is going live with Zoll Care Exchange, an interface that connects patient data from the emsCharts application into Epic. emsCharts is the application used by many local BLS medical transport teams, including Virtua's EMS crews. Due to this new interface, physicians are now able to view data from patients transported via ambulance or medical transport in Epic via the media tab in Chart Review.

Chart Review

1. Select the Media tab
